## LM833

## Low Noise, Audio Dual Operational Amplifier

The LM833 is a standard low-cost monolithic dual general-purpose operational amplifier employing Bipolar technology with innovative high-performance concepts for audio systems applications. With high frequency PNP transistors, the LM833 offers low voltage noise ( $4.5 \mathrm{nV} / \sqrt{\mathrm{Hz}}$ ), 15 MHz gain bandwidth product, $7.0 \mathrm{~V} / \mu \mathrm{s}$ slew rate, 0.3 mV input offset voltage with $2.0 \mu \mathrm{~V} /{ }^{\circ} \mathrm{C}$ temperature coefficient of input offset voltage. The LM833 output stage exhibits no deadband crossover distortion, large output voltage swing, excellent phase and gain margins, low open loop high frequency output impedance and symmetrical source/sink AC frequency response.

For an improved performance dual/quad version, see the MC33079 family.

- Low Voltage Noise: $4.5 \mathrm{nV} / \sqrt{\mathrm{Hz}}$
- High Gain Bandwidth Product: 15 MHz
- High Slew Rate: 7.0 V/ $\mu \mathrm{s}$
- Low Input Offset Voltage: 0.3 mV
- Low T.C. of Input Offset Voltage: $2.0 \mu \mathrm{~V} /{ }^{\circ} \mathrm{C}$
- Low Distortion: 0.002\%
- Excellent Frequency Stability
- Dual Supply Operation

MAXIMUM RATINGS

| Rating | Symbol | Value | Unit |
| :--- | :---: | :---: | :---: |
| Supply Voltage ( $\mathrm{V}_{\mathrm{CC}}$ to $\mathrm{V}_{\mathrm{EE}}$ ) | $\mathrm{V}_{\mathrm{S}}$ | +36 | V |
| Input Differential Voltage Range <br> (Note 1) | $\mathrm{V}_{\mathrm{IDR}}$ | 30 | V |
| Input Voltage Range (Note 1) | $\mathrm{V}_{\mathrm{IR}}$ | $\pm 15$ | V |
| Output Short Circuit Duration (Note 2) | $\mathrm{t}_{\mathrm{SC}}$ | Indefinite |  |
| Operating Ambient Temperature <br> Range | $\mathrm{T}_{\mathrm{A}}$ | -40 to +85 | ${ }^{\circ} \mathrm{C}$ |
| Operating Junction Temperature | $\mathrm{T}_{\mathrm{J}}$ | +150 | ${ }^{\circ} \mathrm{C}$ |
| Storage Temperature | $\mathrm{T}_{\text {stg }}$ | -60 to +150 | ${ }^{\circ} \mathrm{C}$ |
| Maximum Power Dissipation <br> (Notes 2 and 3) | $\mathrm{P}_{\mathrm{D}}$ | 500 | mW |

1. Either or both input voltages must not exceed the magnitude of $\mathrm{V}_{\mathrm{CC}}$ or $\mathrm{V}_{\mathrm{EE}}$.
2. Power dissipation must be considered to ensure maximum junction temperature ( $\mathrm{T}_{\mathrm{J}}$ ) is not exceeded (see power dissipation performance characteristic).
3. Maximum value at $\mathrm{T}_{\mathrm{A}} \leq 85^{\circ} \mathrm{C}$.

#### Abstract

ON Semiconductor and are trademarks of Semiconductor Components Industries, LLC (SCILLC). SCILLC reserves the right to make changes without further notice to any products herein. SCILLC makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does SCILLC assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. "Typical" parameters which may be provided in SCILLC data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. SCILLC does not convey any license under its patent rights nor the rights of others. SCILLC products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or other applications intended to support or sustain life, or for any other application in which the failure of the SCILLC product could create a situation where personal injury or death may occur. Should Buyer purchase or use SCILLC products for any such unintended or unauthorized application, Buyer shall indemnify and hold SCILLC and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that SCILLC was negligent regarding the design or manufacture of the part. SCILLC is an Equal Opportunity/Affirmative Action Employer.
