

NOTES:

1. Use any LM7800 series Voltage Regulators, 3-terminal for VR1.
2. VR1 may need to be heat-sinked.
3. BR1 may be jumped out for step-down DC-DC conversions.
4. Do not connect to the AC Power lines.
5. Do not apply more the 25v DC to the inputs.
6. Do not apply more the 18v AC to the inputs.

- #1762 = 5v
- #1764 = 6v
- #1766 = 8v
- #1767 = 9v
